At temperatures over 806F, product will decompose, generating oxides of sulfur.

Product readily dissolves in water to form a weak sulfuric acid solution. No gases or toxic fumes are emitted from this reaction, but precautions for exposure to sulfuric acid should be followed.

**Extinguishing Media**

Water or dry chemical as appropriate for combustibles in area. Avoid water contact to material if possible.

**Fire Fighting Instructions**

If water is used to extinguish combustibles and product is dissolved in water forming sulfuric acid, wear acid protective equipment. If elevated temperatures (>806F) are reached, self-contained breathing apparatus should be worn.

**6. Accidental Release Measures**

**Small Spills:** Material is granular product and can be swept up from surfaces.
